

Traxis Upgrade 1.0 Instruction

This program is very simple and straightforward to use. A little common sense will take you through its functions without the need for instructions.

If this task seems too difficult for you, do not attempt it. Improper use of this software can damage your receiver and void your warranty. Use this software at your own risk.

1. Power off the receiver
2. Connect the receiver to the PC using the proper RS232 cable
3. Open the Loader program
4. Set the **Com** port to *COM1*, *COM2*, *COM3* or *COM4* to match your PC settings
5. Set **Upgrade** type to *Download Software*, *Download Data*, *Download Loader*, or *Upload Data* depending on the task you want to perform.
6. Click **Open File** and locate the file you want to use.
7. Click **Start**
8. Power your receiver

The transfer will start automatically.

CAUTION: Do not power down the receiver until the download has completely finished.
